Let us introduce...

Curriculum vitae W.J. van Driel

Walter Johan (WJ) van Driel, is an accredited specialist in Endodontics. He is a graduate from the Dental College at the University of Amsterdam where he studied between 1977 and 1984.

After his graduation Walter was an associate of the profession group; cariology, endodontology and pedodontology until 1987 where he earned qualifications in endodontics specifically.

In 1985 he became an university teacher at the General Clinic of ACTA (Academic Centre Dentistry Amsterdam) within the department cariology and endodontology in addition to practicing in a referral dental clinic.

In 1997 Walter was appointed university lecturer within the department cariology, endodontology and pedodontology (CEP) of ACTA where, until 2005 he was heading education of both the post-graduate as well as doctoral courses in endodontics. In addition, Walter also gave postgraduate courses in endodontics to dentists on behalf of the CEP department.

Since 1994 Walter held various functions within NVVE, (Dutch Association of Endodontics) including being appointed President, a role he held between 1997 – 2000. Subsequently, for a period of five years Walter became Editor in Chief for Het Kanaal, the official newsletter of NVVE published 4 times yearly. Recently he has been awarded with a honourable membership.

Walter is also a member of various scientific society's including being a Fellow of the International College of Dentists (ICD) since 2000. At present he holds the office of Treasurer in ICD-Europe.

Within the Dutch Dentistry Society (NMT) Walter has been active in various focus groups. The most important of these was the Project Group for Endodontic Tariffs (PTE). Amongst others, a significant result was a tariff for the use of microscope handling within endodontic treatment – a unique way of working for Europe.

Walter has in parallel held a referral Practise specialised in Endodontics since 1985, currently in Sassenheim - based in the province South Holland.

GT X Hands-on-kurs!

Dr Walter Van Driel...

...om nya GT X-filen

Dr Van Driel introduces **GT Series X ...**

The biomechanical preparation of root canals can be very challenging. Especially when the root canal is narrow and curved. This is often the case in difficult to access molar teeth.

The objectives of shaping techniques are to provide access for irrigants during treatment procedures to clean and to provide a tapered space so that obturation instruments can fit freely in the root canal system. This is necessary to create a hermetic seal with root canal filling materials. This all can be accomplished by removing dentin using a variety of instruments, for instance the GTX system, to enlarge the root canal space in three dimensions.

After this course you will understand the principles of the tapered preparation technique with the GTX system and you also will experience in practise that this method of preparing root canals is safe, effective, efficient, predictable and convenient.

KURSPROGRAM

Föreläsning och demonstration av Dr Walter Van Driel, Holland.

Den nya GT X-filen

DEL I. TEORETISK GENOMGÅNG:

Kaffepaus – cirka kl. 18.00

DEL II. PRAKTISK GENOMGÅNG:

- Hands-on träning så att deltagarna kan använda systemet på patient direkt efter kursen. Deltagarna rensar medtagna cavumpreparerade tänder med hjälp av endomotorer, vinkelstycken samt maskinella nickeltitan filar. OBS! Tag med extra-herade tänder.

OBS! Kursen hålls på engelska

TID OCH PLATS

Målgrupp: tandläkare

Presentation kl. 16.30 – cirka kl 21

Göteborg
måndagen den 27 september 2010
tisdagen den 28 september 2010
